SEWERAGE & WATER BOARD OF NEW ORLEANS/ CITY OF NEW ORLEANS COORDINATION

Work Accomplished:

- On December 10, 2015, the City of New Orleans and the Sewerage and Water Board of New Orleans reached a settlement with Federal Emergency Management Agency (FEMA) for street and subsurface infrastructure repairs related to Hurricane Katrina in the total amount of approximately \$2.4 Billion. This will allow for additional infrastructure projects that will be coordinated through the combined efforts of DPW and the Board.
- The CNO and SWBNO jointly developed an aggressive schedule for the expenditure of the \$2.4 Billion to FEMA for their review and approval on March 30, 2016. This schedule has already been implemented and includes the ongoing design of approximately 240 infrastructure projects, of which 30 projects are in the construction phase. This will allow for a continued increase in construction activities in 2022 as we ramp up our efforts to perform repairs on assets damaged as a result of Hurricane Katrina.
- The City of New Orleans and Sewerage and Water Board of New Orleans continue to re-evaluate the design and construction schedules so that they align and meet imposed deadlines set forth in the 3rd Modified Consent Decree.

Section I

Sewer Overflow Action Plan

THIRD MODIFIED CONSENT DECREE SECTIONS XIII, XIV, XIX PARAGRAPHS 31, 35, 57a SEWER OVERFLOW ACTION PLAN UNAUTHORIZED DISCHARGE TRACKING AND REPORTING PLAN

Paragraph 57a: Requires the Board’s annual report to include information on Sewer Overflow Action Plan (SOAP) activities (Modified Consent Decree Exhibit 4). These SOAP activities include, but are not limited to:

- Number of responses to unauthorized discharges
- Response times for each discharge
- Actions taken to clean up and disinfect the discharge site

Work Accomplished:

- In 2021, from January 1 through December 31, there were a total of 518 unauthorized discharges from the gravity system mains, sewer force mains and sewer pumping stations. The Board’s response to two (2) of these discharges exceeded the response time goal set out in the Sewer Overflow Action Plan.

Paragraph 31: Requires the Board to comply with the Sewer Overflow Action Plan in accordance with its procedures.

Paragraph 35: Requires the Board to comply with the Unauthorized Discharge Tracking and Reporting Plan in accordance with the schedule and procedures specified therein.

Because Paragraphs 31 and 35 are closely related, and information in the various appendix reports often overlaps between activities related to the Sewer Overflow Action Plan and the Unauthorized Discharge Tracking and Reporting Plan, this “Work Accomplished” section contains information on both plans.

Work Accomplished:

- *Appendix Tab 1* contains a report of the Board’s 2021 SOAP activities with respect to unauthorized discharges from the gravity system mains, sewer manholes, sewer force mains, and sewer pump stations. These tables set out the street address, the date and time of the service request, the date and time the crew arrived at the discharge site, the response time and response goal, and whether the response goal was met. Response times exceeding the response goals are identified with an “N” in the Met Response Time Goal column. The report covers January 1 through December 31, 2021.

Section I

Sewer Overflow Action Plan

- In 2021, from January 1 through December 31, there were a total of 518 unauthorized discharges from the gravity system mains, sewer force mains and sewer pumping stations. The Board's response to two (2) of these discharges exceeded the response time goal set out in the Sewer Overflow Action Plan.
- *Appendix Tab 2* contains the "Key to Measures Taken in Response to Unauthorized Discharges." The Board uses codes from the key to identify control measures taken. These codes permit the Board to accurately document field activities pertaining to the cleanup and disinfection of discharge sites. The Board is updating the key to reflect changes in personnel and equipment associated with responding to sanitary sewer overflows. See attached revised form.
- The Board has complied with Sewer Overflow Action Plan and the Unauthorized Discharge Tracking and Reporting Plan since entry into the Modified Consent Decree. However, following an internal audit review of monthly bypass reports, the Board determined 94 unauthorized discharges occurred in the first quarter of 2021 which were not reported. Of the 94 unauthorized discharges, only one failed to meet the response time goal.
- The deficiencies noted above occurred during a change in personnel responsible for preparation of the reports and reduced staffing due to COVID-19. The Board has reviewed the Modified Sewage Overflow Action Plan (SOAP) dated December 31, 2008 with staff responsible for preparing the report. To ensure the accuracy of all future reports, the Board has implemented a weekly SSO report which is used to verify all SSOs reported on the monthly report. Also, the Board's IT Department performs an integrity report which confirms the report is accurate based on formulas used to calculate response time rather than relying on hand calculations. In addition, the Environmental Affairs Department conducts the final review and verifies all SSOs have been reported and response times are calculated according to the SOAP. Revisions to the monthly bypass reports have been made and are found in *Appendix Tab 1*.
- Gravity System Unauthorized Discharges:
2021:
 - With respect to unauthorized discharges from the gravity system, the Board exceeded the response goal for two (2) discharges for 2021. See *Appendix Tab 1*.
 - The Board did not comply with the response time goal set out in the Sewer Overflow Action Plan for two (2) discharges.

Section I

Sewer Overflow Action Plan

- Sewer Force Main Unauthorized Discharges:
2021:
 - With respect to unauthorized discharges from the sewer force main system, the Board met all its response time goals for 2021. *See Appendix Tab 1.*
 - The Board complied with the response time goal set out in the Sewer Overflow Action Plan for these discharges.
- Pump Station Unauthorized Discharges:
2021
 - With respect to unauthorized discharges from sewer pump stations, the Board met all its response time goals for 2021. *See Appendix Tab 1.*
 - The Board complied with the response time goal set out in the Sewer Overflow Action Plan for these discharges.

Section I

Sewer Overflow Action Plan

An internal audit was conducted during a review of the bypass reports while investigating a customer complaint sent to the Board by LA Department of Environmental Quality. The internal audit covered the period September 2019 to August 2021. The 2019 and 2020 Annual Reports are being revised and will be resubmitted in a timely manner.

As noted above, during the internal audit of 2021 monthly bypass reports, the Board determined the response to two (2) of these unauthorized discharges from the gravity system exceeded the response time goal set out in the Sewer Overflow Action Plan. On January 25, 2021, a customer complaint was received by the Board; although, the Board responded the same day, it exceeded the SOAP response time by 4 hours, 3 minutes. Approximately 1,932 gallons overflowed from the sanitary sewer system.

On April 16, 2021, a customer complaint was reported to the Board, in which the Board erroneously did not respond until April 22, 2021 (5 days, 8 hours, 30 minutes). Approximately 34,200 gallons overflowed from the sanitary sewer system. The cause of the delayed response can be attributed to personnel oversight. The Board is in the process of determining stipulated penalties and will be sending notices in a timely manner.

The deficiencies noted above occurred during a change in personnel responsible for preparation of the reports and reduced staffing due to COVID-19. The Board has reviewed the Modified Sewage Overflow Action Plan (SOAP) dated December 31, 2008 with staff responsible for preparing the report. To ensure the accuracy of all future reports, the Board has implemented a weekly SSO report which is used to verify all SSOs reported on the monthly report. Also, the Board's IT Department performs an integrity report which confirms the report is accurate based on formulas used to calculate response time rather than relying on hand calculations. In addition, the Environmental Affairs Department conducts the final review and verifies all SSOs have been reported and response times are calculated according to the SOAP.

Most of the unauthorized discharges experienced by the Board from the gravity system are caused by a choke in the line. The Board's primary goal in response to sanitary sewer overflows is to resolve the cause of the choke as quickly as possible and mitigate any effect of the overflow. In this regard, it is the customary practice of the Board to have a team at the problem site within the established response time goal of the SOAP to correct and remove the cause. The field team then determines whether any sewage can be recovered from the storm drainage system. In many cases, this is not feasible because the sewage has run off via a subterranean canal system and has co-mingled with the groundwater flow in the system.

The Board's ability to capture and reintroduce sewage to the proper system is usually specific to areas in New Orleans East and any area of the city with open drainage canals. Also, unless the cause of the problem is a broken pipe or some other situation that will dictate less than immediate resolution, it is not usually possible to collect the spilled sewage. The field team will always clean up any solid debris and wash down and disinfect the area of the overflow before leaving for the next job.

Section I

Sewer Overflow Action Plan

The Board is continuing its public education campaign with residents, restaurants, hotels and other commercial establishments in the City of New Orleans regarding how to properly dispose of kitchen grease and other debris to prevent clogging the sanitary sewerage system and causing overflows. This program also includes a one-on-one educational session with violators and suspected illegal dischargers. The Board provides a copy of the Water Environment Federation's informational brochure, Fat Free Sewers, to restaurants, hotels, and other establishments that have the potential to discharge grease into the sewerage collection system. A warning letter is issued to potential problem locations. A violation letter and monetary penalty is issued where proof of a violation is found. Fines are issued using the approved Enforcement Response Plan as a guide to allow escalation of penalties until problems are resolved.

Section II

Preventive Maintenance Program

Paragraph 26: Requires the Board to comply with the Preventive Maintenance Program in accordance with the procedures and schedules therein.

Paragraph 57b: Requires the Board's annual report to include information on activities listed on the table "Preventive Maintenance-Quantifiable Measures" in the Preventive Maintenance Program (Modified Consent Decree Exhibit 3.) The report on preventive maintenance shall include the following information:

Storm Sewer Monitoring Plan

THIRD MODIFIED CONSENT DECREE SECTIONS XVI, XIX PARAGRAPHS 47–53, 57c STORM SEWER MONITORING PLAN

Paragraph 47: States the purpose of the Storm Sewer Monitoring Program is to provide baseline data on the presence of sewage indicating pollutants in the East Bank drainage system before and after RMAP implementation in each drainage basin. Stormwater sampling will be done to accomplish this purpose.

Work Accomplished in a previous year:

- As a requirement of the Consent Decree, the Board established a Storm Sewer Monitoring Program (SSMP) designed by EPA to provide baseline data on the presence of sewage in the East Bank drainage system. In April 1998, the Sewerage and Water Board hired ADS Environmental Services (ADS) to conduct stormwater sampling pursuant to the regimen dictated by the Consent Decree.

Paragraph 48: Sets the schedule for Phase I and Phase II sampling. Phase I sampling will commence within 180 days of lodging. Six (6) quarterly samples will be taken within a two (2) year period. Phase II sampling will be initiated following remediation of sewerage basins, which are contained within the drainage basins, which are tributary to each drainage pumping station. Commencing no later than 180 days after completion of remediation of all sewage basin(s) within an individual drainage pump station basin, the Board shall collection six (6) quarterly samples over eight quarters. The program will continue until Remedial Measures Action Plans have been completed in all sewage basins and final drainage basin sampling is complete.

Work Accomplished in a previous year:

- Samples for the third quarter of the program (first quarter, 1999) were collected on January 9, 1999. They were collected between six and twelve hours following the specified rainfall event.
- Samples for the fourth quarter of the program (second quarter, 1999) were collected on May 11, 1999. They were collected between six and twelve hours following the specified rainfall event.
- Samples for the fifth quarter of the program (third quarter, 1999) were collected on July 20, August 9, and September 2, 1999. They were collected between six and twelve hours following the specified rainfall event.
- Samples for the sixth quarter of the program (fourth quarter, 1999) were collected on October 8, 1999. They were collected between six and twelve hours following the specified rainfall event.

Section III

Storm Sewer Monitoring Plan

Paragraph 49: Requires the Board to conduct all sampling and analysis in accordance with EPA approved methods under 40 C.F.R. Part 136, or where EPA methods do not exist, in accordance with the then current edition of the Standard Methods for the Examination of Water and Wastewater.

Work Accomplished in a previous year:

- The Board conducted all sampling and analyses in accordance with EPA approved methods under 40 C.F.R. Part 136, except for caffeine. In the case of caffeine, no appropriate EPA approved method existed. These samples were analyzed by the HPLC method according to the latest edition of Standard Methods for the Examination of Water and Wastewater.

Paragraph 50: Requires the Board to analyze samples for fecal coliform, fecal streptococcus, enterococcus, and caffeine.

Work Accomplished in a previous year:

- A sample was taken at DPS 10 on March 8, 2000 to replace a sample taken at this location in the first quarter of the program. The previous sample was discarded because it did not meet requirements set forth in the Consent Decree. The sample was analyzed for fecal coliform, fecal streptococcus, enterococcus and caffeine. The sample satisfies the sixth quarter program sample for this location.

SWBNO/City Coordination

THIRD MODIFIED CONSENT DECREE SECTION XIX

PARAGRAPH 59

SEWERAGE & WATER BOARD OF NEW ORLEANS/ CITY OF NEW ORLEANS COORDINATION

Paragraph 59. This paragraph requires the Board to summarize the Board and City's coordination efforts and work progress, including a summary of significant coordination efforts undertaken during the reporting period and a chart depicting those efforts. The chart shall identify each project (contract) on which the Board and City are coordinating or at the time of submitting the report, reasonably expect to coordinate, the estimated budget for each entity's share of the work (including the expenditure of federal funding that the Board and City reasonably expect to make at the time of submitting the report), the current status of that coordinated work, and the estimated and actual date for design completion, contract advertising, notice to proceed, and construction completion. With respect to the summaries and information reported under this paragraph 59, all parties understand that the amounts and dates of anticipated federal funding expenditures regularly change, that the reported information reflects what is anticipated at the time the Board submits it, and that the information is likely to change between each report.

Work Accomplished:

- On December 10, 2015, the City of New Orleans and the Sewerage and Water Board of New Orleans reached a settlement with Federal Emergency Management Agency (FEMA) for street and subsurface infrastructure repairs related to Hurricane Katrina in the total amount of approximately \$2.4 Billion. This will allow for additional infrastructure projects that will be coordinated through the combined efforts of DPW and the Board.
- The CNO and SWBNO jointly developed an aggressive schedule for the expenditure of the \$2.4 Billion to FEMA for their review and approval on March 30, 2016. This schedule has already been implemented and includes the ongoing design of approximately 240 infrastructure projects, of which 30 projects are in the construction phase. This will allow for a continued increase in construction activities in 2022 as we ramp up our efforts to perform repairs on assets damaged as a result of Hurricane Katrina.
- The City of New Orleans and Sewerage and Water Board of New Orleans continue to re-evaluate the design and construction schedules so that they align and meet imposed deadlines set forth in the 3rd Modified Consent Decree.
