

We Installed Your New Smart Meter Today!

See other side to learn how this technology will empower you as a customer.

Sometimes a meter replacement can allow air, debris, or potential contaminants to enter your water line. We recommend you flush your plumbing by running the cold water in your bathtub or shower for a few minutes.

Questions about your installation?

Call our partner, **Aqua-Metric** at **504-313-1576**, 24/7.

We Couldn't Replace Your Meter Today.

- We could not access your meter box.
- Your water was in use when we attempted to install your meter.
- Further investigation is required before replacement.

Don't worry! We'll return at a later date to install your new smart meter. If necessary, we will contact you to coordinate your installation.
